

Some awards speak for themselves...

NuDetect – Most Critical Cybersecurity Solution in the Last 30 Years

"Over the last three decades, the winners of our 30th Anniversary Awards have left an indelible imprint on the cybersecurity industry through their tireless work and visionary leadership. NuData has most assuredly earned this honor for its continued dedication to protecting enterprises from today's sophisticated threats".

Illena Armstrong, VP, editorial, SC Media

Why? Because of our:

Multi-layered approach: Instead of relying on a single-purpose tool, NuDetect integrates four layers to detect a wide-array of attacks including account takeover, application fraud, and account hijacking.

Deep visibility: NuDetect's powerful four layers increase visibility into our client's traffic, detecting fraud even weeks before it would have happened with over 99% accuracy.

Customer experience: Our integrations team takes all the necessary time to understand each client's specific pain points, making them feel they are the only customer.

Continuous verification: We continuously monitor different placements to build an accurate digital profile and improve the good user experience.

Rules engine: Clients can build rules with our user-friendly dashboard, from triggers to complex multi-step policies and processes.

What does this award mean?

We stand out from our competitors as a best-in-class fraud detection solution because we:

- Pioneer passive biometrics technology that shows what's behind each attack and how to prevent it.
- Offer an integrated layered approach that addresses multiple industry points.
- Reduce manual processes while improving customer experience.
- Closely partner with our clients to understand and adapt to their changing needs.
